Tamara Wilgers, Director of Technology Commercialization and Economic Development at the University of Missouri–St. Louis, works to stimulate the development and commercialization of advanced technology on campus. In her 13 years at UMSL, Tamara has helped facilitate an increase in the number of invention disclosures received, options and licenses executed, and startup companies established to commercialize university research. On behalf of the university, Tamara interacts with faculty, community, and business and state government leaders to promote UMSL intellectual property. She also represents UMSL on the Missouri Venture Forum Board of Directors and as chair of the Association of University Technology Managers (AUTM) Central Region. Prior to joining the University of Missouri, Tamara managed the St. Louis Technology Gateway Council, served as co-editor of the St. Louis Business Journal’s monthly “Fast Forward” magazine about young entrepreneurs, and directed communications for the Greater St. Louis YMCA Corporate Office.
